INDUSTRY SECTOR EXPERTISE

CUSTOMER CENTRIC

SEKO Logistics
Global Supply Chain Solutions

We provide a suite of logistics services which enable you to use your supply chain as a competitive differentiator. As a customer centric organization, we are powered by the expertise of our people and our in-house developed, best in class, customizable technology. It is this combination which gives the company its strength.

Who we are

SEKO started out in business in 1976, operating out of a single Chicago office. Since then, we have built a solid reputation throughout the world as an innovative and flexible provider of first-class logistics services. Today, we provide complete Supply Chain Solutions, specializing in transportation, logistics, forwarding and warehousing. We also lead the industry with innovative and customizable IT solutions, which provide a seamless flow of information and give our growing customer base true supply chain visibility.

How we work

With over 120 offices in 40 countries worldwide, our unique ownership management model enables you to benefit from Global implementation experience and expertise across all industry sectors, coupled with vital in-country knowledge and service at the local level. This unique model provides you with:

- Hands-on service and support
- Personal relationships
- Creative, customized solutions
- Responsiveness and reliability
- Flexibility and consistency

We have a flat management structure, with just three layers between you and the CEO, making us 'fast on our feet' in delivering solutions that can meet your exact requirements. This lean and nimble structure increases our decision-making speed and gives us an ability to implement customized solutions which far exceed those of our competitors.

What we do

SEKO is committed to developing efficiencies and optimizing your supply chain. We take time to understand your requirements and build our processes and service around your business, leaving you free to dedicate your time to what you're good at, growing your company's profits.

We achieve this by simplifying processes, by providing the right service and cost options with multiple carriers, and by improving your ability to monitor and track sales and purchase order activity. Our logistics solutions are lean and efficient, with the core aim of improving your customer satisfaction and keeping your business running at peak performance.

Our Transportation and Logistics Services

Air Freight Logistics

When it comes to air freight logistics every SEKO office has the same goal - to provide outstanding service and competitive pricing. Our experience helps us meet those goals, 7 days a week, 365 days a year. SEKO also specializes in domestic air freight logistics for the United States and China.

Ocean Logistics

Our Global network encompasses more than 40 countries, including all the world's major seaports, moving cargo to and from hundreds of ports worldwide. Our employees are intimately familiar with all the local customs, laws and regulations - saving you time and money, and ensuring that your shipments safely reach their final destination.

Ground Transportation

SEKO contracts with thousands of trucking companies in Asia, Europe, North America and Africa to provide expedited and deferred transportation alternatives. We handle movements across borders seamlessly - and final-mile deliveries with care and experience, always with a full understanding of the end customer's expectations.

SEKO offers home delivery, final-mile ground and parcel solutions as your most reliable and cost-effective option for eCommerce, heavyweight, oversized and high value goods - featuring time definite appointments, complete with additional services such as set up, trash removal and more, for more.

Customs and Compliance

SEKO provides customs and compliance services throughout the world, to ensure that your shipments meet all Global import and export regulations. Whether it's informal or formal entries, personal effects, duties, government licensing or bonded warehousing, we have the resources and the expertise to help your shipments cross borders seamlessly. We also offer compliance consulting, training and implementation support.

Logistics and Order Fulfillment

SEKO's Global infrastructure is comprised of multi-user shared logistics facilities. This enables us to offer truly customized business process outsourcing services more cost effectively than if our clients were to run their own dedicated facility. Our clients benefit from having a variable cost logistics model supported by SEKO's expertise, know-how and Global warehouse locations - so they can concentrate on their core business activities.

"I love working with you guys. Whether it be in billing, transportation, quotes, or basically anything that your company has to offer us, it has always been with the best customer service."

Anita Davidson - Hutchinson FTS

Who we work with

The evolution of Global market opportunities demands evolved processes and procedures. At SEKO, our expertise enables your business to move forward fast by tailoring our smart supply chain solutions to power your business growth, whatever industry sector you're in. Our award-winning range of worldwide logistics services are customized to your exact fit, with extensive experience in numerous industry sectors:

Retail

SEKO offers an array of services that have been tailored to specifically suit our retail client base. From vendor consolidation and freight forwarding to e-fulfillment and multi channel distribution, we provide robust, scalable logistics foundations to power the growth of your business.

For fashion brands and retailers, our web-based customizable supply chain software tracks and reports the status of your samples, production progress, critical path milestones and purchase order activity, leaving you free to manage your fashion logistics by exception, avoiding any last minute surprises.

Government

SEKO has the dependable resources, the experience and the reach to safely and securely pack and ship everything from aid and relief supplies to aircraft engines, and laptop computers to sophisticated radar equipment. We offer short-term and long term warehousing, and can ensure that your most sensitive shipments reach the world's most complex areas with full regulatory and security compliance.

Medical

SEKO provides best in class, time-definite logistics solutions for high value, sensitive medical devices such as diagnostic and imaging equipment. Delivered via a comprehensive suite of customized IT solutions, MedTec certified 3PL warehouses and an Air Ride Network, SEKO can set up, deploy and handle your demonstration equipment, finished goods installations and return material authorization logistics.

With more than 25 years of pharmaceutical and biotechnology logistics experience, SEKO is a provider you can trust. We provide a value-added pharmaceutical sample delivery program and full-scale ambient and cold chain trade/revenue logistics service which meets all of the required industry standards.

Industry sector expertise enables your business to move forward fast

Industrial

SEKO manages Global supply chains for many of the largest aerospace, chemical and manufacturing suppliers around the world. With our vendor management solutions, Global control towers and transportation optimization, we reduce total landed costs while increasing service and speed, regardless of sourcing locations.

We also have dedicated pick and pack operations in China, Europe and the United States that cater exclusively for some of the world's largest airlines, suppliers and defense contractors. SEKO offers you both consolidated logistics and amenity kit picking and packing solutions, while delivering your finished products to almost anywhere in the world.

Technology

From fast-moving consumer electronics to high tech hardware and equipment, we understand the security and sensitivity required to get your high value displays, screens, computers and more to market quickly and safely. Our in-house developed software, coupled with GPS tracking, can give you added comfort that your products will arrive intact.

Automotive

SEKO provides Global and local manufacturing support logistics for OEMs, tier one suppliers and retail service operations. From inbound supply chain management to warranty parts replenishment, we are experienced in delivering Global automotive solutions.

Energy

We tackle some of the biggest supply chain challenges for oil & gas, renewable energy and mining clients around the world, handling long-haul transportation, project cargo, distribution and charter moves - as well as regular replenishment of parts and supplies for extraction sites, manufacturing support and distribution.

Displays and Marketing Projects

Our logistics solutions for displays and marketing projects are designed to support tradeshows, exhibits, retail merchandising displays, store launches and experiential marketing. With zero room for error, SEKO assists your marketing projects with precision and care, for all of your marketing logistics needs.

Customized IT Solutions

SEKO's leading-edge web based supply chain software has been developed in-house, enabling us to deliver a unique service offering and a truly customized solution which will improve processes, reduce workloads and increase margin opportunity.

Our systems are easy to integrate and can be tailored to meet the requirements of each individual client, enabling you to quickly generate a significant return on investment. Using your existing business processes and best practices as a blueprint, we develop a software application and infrastructure that is right for you - creating a customized solution that is simple to use, fast to implement and as unique as your business.

Enabling us to deliver a unique service offering and a truly customized solution

"Just wanted to say THANK YOU for your team's effort to assist us on the shipment from Miami over the weekend. We really appreciate the team effort and dedication. Not many companies are willing to go the extra mile these days and we appreciate your support."

Theresa Bell - Curtiss Wright

MySEKO

MySEKO provides access to all of SEKO's technology solutions. Whether you require a web based inventory management solution to watch over your stock in Holland, a transportation management system to control your US distribution costs and automate your dispatches, a fully integrated eCommerce website, an online solution to manage your offshore vendors, or real-time GPS tracking of a sensitive shipment - SEKO can provide everything through a single login to the MySEKO portal.

Our customized web based transportation and logistics suite gives you a complete view of your account and your activities - allowing you to book domestic and international shipments online, track and trace, print BOLs and shipping labels, view account balances and run customized management reports.

eCommerce

Architecting your supply chain for the ever-growing demands of the consumer marketplace can be daunting. Websites, optimization, warehouses, returns, small parcel freight carriers, the list goes on. The SEKO eCommerce solution can execute your website generation and maintenance, warehouse management, transportation management, routing instructions, and dynamic reporting. It's an end-to-end supply chain solution for your web based orders, which enables you to manage your inventory and your website.

PO Management

SEKO's Purchase Order Management is a user-friendly system that provides real-time control and processing of sales and purchase transactions, no matter what their status. Giving you true visibility within your supply chain and enabling you to manage vendors by exception, with better control over inbound shipments and true end-to-end visibility.

Warehouse Management System

Our Warehouse Management System (WMS) increases your level of management when maintaining tight inventories and enables you to optimize inventory by automatically identifying and assigning the nearest available part for each shipment. This reduces transportation costs, transit-time and turn-time and avoids shipment overlap.

Transportation Management System

Our Transportation Management System (TMS) is a fully customizable application with a status/event driven design that enables you to 'shop around' for best pricing, consolidate orders, customize and run reports and audit freight bills. Your contracted carriers are also integrated, allowing them to tender shipments supported by their routing guide.

Data Integration

Data Integration streamlines processes, reduces costs and improves data visibility from your ERP to your product delivered to your customers. Our operating platform enables the flexibility to provide various means of Data Integration, with capabilities including EDI, XML, SEKO Red dx (database exchange), x catcher, FTP file sharing and other methods.

SEKO GPS

Designed for companies that ship items requiring secure chain-of-command custody, SEKO GPS is a transport program that provides unprecedented security and real-time shipment location and status information, with four Security Level options.
