

Intelligence Delivered

Logistics and Order Fulfillment

SEKO's Global infrastructure is made up of multi-user logistics facilities throughout the world, enabling us to stock your products and fulfil orders in a more timely and cost effective manner in each local market. This provides you with a 'pay-as-you-go' business model, fully supported by SEKO's logistics expertise and web-based technology.

"I would highly recommend SEKO to other companies looking for great service. The service that I have received from SEKO has been flawless - friendly, efficient, price competitive, organised and extremely helpful."

Susie Ancell - MyTuxedo

Multi-user Logistics Facilities

We can provide shared warehouse solutions in as many as 40 countries worldwide. This means that you can benefit from the economies of scale of our multi-user logistics sites, because you only pay for the space you use from one month to the next.

Many of our clients ask us to replicate the processes of an existing facility already run by them in another country as part of their Global expansion strategy. We are experts at managing projects of this type, and such is our reach that we can rapidly provide multi channel logistics solutions almost anywhere in the world, with careful project management.

Contract Logistics

SEKO also offers dedicated site solutions on a contract logistics basis. We can provide as much consultation and project management as necessary to ensure your exclusive logistics operation is designed professionally, with your business requirements in mind, sited in the right location(s) and run the way you want it run. All of this is done within the parameters of your budget and in alignment with your goals, on a win/win supplier partner basis.

This enables you to reinvest the working capital that would otherwise have been consumed through real estate costs, personnel resources and other costs associated with the burden of running your own operation - so you can concentrate on building your business.

SEKO's contract logistics services include product launches, manufacturing (light assembly) pick and pack, gift wrapping, eCommerce, order receipt and fulfilment, inventory, replenishment and management of suppliers and clients.

What next?

To find out more about SEKO's Logistics and Order Fulfillment services, please email hello@sekologistics.com

eCommerce Fulfillment

Through our extensive network of over 120 offices in 40 countries, we can provide multi-regional inventory stocking locations - enabling you to offer a local delivery experience and service without the cost infrastructure and burden of your own operation, so that you can concentrate on your international web sales strategy.

For instance, many of our clients like us to hold stock for them at satellite facilities in Asia, Europe and the United States. These satellite hubs pull stock from a master location (a SEKO facility or the client's) and provide cost-effective storage and delivery solution for web and catalogue purchases, to homes and businesses across the world.

Global Stock Visibility

Our 24/7 client service centers use our state-of-the-art technology suite, that is available anytime, to monitor shipments for you. As part of the SEKO solution, you can also track and trace your sales orders online in real time, see all of your stock centrally, place sales orders manually (if necessary) and provide instructions to relocate product as required.

SEKO MedTec

With SEKO MedTec, we have developed a highly specialized solution which is focused exclusively for the medical, technology and retail industries. SEKO MedTec provides dedicated program management for demonstration equipment, finished goods and returns, as well as contract logistics and fulfillment services. Our engineering, transportation and software expertise is backed up by our control towers, knowledgeable staff and dedicated clean rooms and facilities.

Asset Management

When you have demonstration equipment, tradeshow displays or other reusable, high value parts moving around the world, you still need to manage and measure those assets as if they were stocked inventory sitting in your warehouse. Our asset management technology and services give you the ability to track all of your valuable inventory in the field using our mobile WMS or Asset Management technology.

Reverse Logistics

We handle everything from standard returns and warranties, right through to FDA medical returns, hazardous materials disposal, asset recovery and more. In short, we make reverse logistics the simplest part of your job

About SEKO Logistics

We provide a suite of logistics services which enable you to use your supply chain as a competitive differentiator. As a customer centric organization, we are powered by the expertise of our people and our in-house developed, best in class, customizable technology. It is this combination which gives SEKO its strength.

With over 120 offices in 40 countries worldwide, SEKO's unique shareholder management model enables you to benefit from our specific industry sector expertise, coupled with vital in-country knowledge and unparalleled service at the local level. This unique model provides you with:

- Hands-on service and support
- Personal relationships
- Creative, customized solutions
- Responsiveness and reliability
- Flexibility and consistency

We have a flat management structure, with just three layers between you and the CEO, making us 'fast on our feet' in delivering solutions that can meet your exact requirements. This lean and nimble structure increases our decision-making speed and gives us an ability to implement customized solutions which far exceed those of our competitors.
