

Intelligence Delivered

Reverse Logistics

Reverse Logistics can be costly, time consuming and complex. Why not make it easy and let SEKO ship it back? Our Reverse Logistics team handles everything from standard returns and warranties, right through to FDA medical returns, hazardous materials disposal, asset recovery and more. In short, we make Reverse Logistics the simplest part of your job.

With over 120 locations around the globe, we are perfectly positioned to serve your Global supply chain needs. No matter where you are, there's a SEKO office nearby - with many of our offices being specially trained to handle high value shipments such as medical equipment, hardware and electronics.

“We were very pleased with the level of service provided by the SEKO team. Barrie and Maria are extremely good at the work they do. They handle the daily volume of requests we send their way and are always willing to go the extra mile when challenging assignments are encountered. We value our partnership with SEKO.”

Reta Rue - Wells Fargo

Warranty Returns

Under our Warranty Returns Program, our specialists will manage the return materials authorization, picking up recalled items and installing new, while disposing of defective parts or units at our facility.

Asset Recovery

With some high value equipment, what goes out doesn't always come back. When your demo equipment comes back with missing parts, or doesn't come back at all, SEKO's Asset Recovery service tracks down and returns your assets, saving you money and headaches.

Superior Technology

Our technological expertise gives us the ability to download information from your systems, list all of your assets, build a database to tell us where they are located, and then track their movement throughout your network - right down to the smallest parts.

"Today's meeting was super-fast and very positive. We had 100% on-time deliveries and 99.145% on-time pickups. Good comments and overall feedback from the Reverse Logistics team and their customers!"

Maria Balatsias - Wells Fargo

Flexibility

Because we are a non asset based carrier, we have the flexibility to offer real optimization and save you money.

Green Disposal

Our offices will break down units for sustainable disposal - for example separating lead and mercury in medical devices or electronics - and dispose of them in an environmentally friendly way. And we'll provide all the necessary documentation for the process.

Military and Government Returns

SEKO has helped customers like the US State Department and US Customs in asset recovery, and in redeployment of goods and equipment from danger zones around the world.

Reporting

Because data management and logistics management go hand in hand, we have focused on building sophisticated reporting capabilities, enabling us to provide extensive information and documentation on everything we handle. Because our technology is better, the value and benefit we provide to our clients is better.

Customer Service

We strive to know as much about your business as you do. Our employees engage with you at a deep level, making your knowledge our knowledge.

About SEKO Logistics

We provide a suite of logistics services which enable you to use your supply chain as a competitive differentiator. As a customer centric organization, we are powered by the expertise of our people and our in-house developed, best in class, customizable technology. It is this combination which gives SEKO its strength.

With over 120 offices in 40 countries worldwide, SEKO's unique shareholder management model enables you to benefit from our specific industry sector expertise, coupled with vital in-country knowledge and unparalleled service at the local level. This unique model provides you with:

- Hands-on service and support
- Personal relationships
- Creative, customized solutions
- Responsiveness and reliability
- Flexibility and consistency

We have a flat management structure, with just three layers between you and the CEO, making us 'fast on our feet' in delivering solutions that can meet your exact requirements. This lean and nimble structure increases our decision-making speed and gives us an ability to implement customized solutions which far exceed those of our competitors.
