**SEKO eCommerce Solutions**

## Architecting your supply chain for the ever-growing demands of the consumer marketplace can be daunting. Websites, optimization, warehouses, returns, small parcel freight carriers, the list goes on.

The SEKO eCommerce solution can execute your website generation and maintenance, warehouse management, transportation management, routing instructions, and dynamic reporting. It's an end-to-end supply chain solution for your web based orders, which enables you to manage your inventory and your website.

Many companies have developed their eCommerce supply chain program as an extension of their existing retail channels, but more and more of them are realizing that online retailing requires dedicated and sophisticated solutions. We can help retailers to set up and deploy complete turnkey eCommerce solutions that replace their legacy and standalone operations, increasing revenues while also driving down costs.

**“We’ve integrated our eCommerce system with SEKO’s Warehouse Management System, which now allows us to see, with 100% accuracy, exactly what stock we have in the warehouse. Together with SEKO’s more accurate picking system, this has allowed us to hit 100% KPIs on next day delivery. Which is definitely a huge advantage with growing our eCommerce business.”**

**Howard Harrison - Knomo**

## Helping your website to sell more

We can build a new eCommerce website for you, or we integrate with your existing site if you prefer. We can also implement search engine optimization as well as providing multi-location warehousing, fulfilment and delivery solutions to support your web strategy, Globally.

## Global eCommerce Warehouse Locations

Through our extensive network of over 120 offices spanning 40 countries, SEKO provides multi-regional inventory stocking locations, enabling you to offer a local delivery experience and service without the cost infrastructure and burden of your own operation so that you can concentrate on your international web sales strategy.

For instance, many of our clients like us to hold stock for them at satellite facilities in Asia, Europe and the United States. These satellite hubs pull stock from a master location (a SEKO facility or the client's) and provide cost-effective storage and delivery solutions for web and catalogue purchases, to homes and businesses across the world.

## Global Stock Visibility 24/7

Our 24/7 client service centre uses our state-of-the-art technology suite and is available anytime to monitor shipments for you. As part of the SEKO solution, you can also track and trace your sales orders online in real time, see all of your stock centrally, place sales orders manually (if necessary) and provide instructions to relocate product as required.

**“I wanted to just thank you all personally for all your amazing efforts during this very busy past few weeks. We have had the best sale ever and it wouldn't have gone as well without your constant support and efforts through our busiest times.”**

**Ellie Rivers - Lulu Guinness**
