

**SEKO**

*Intelligence Delivered*

**Ground Transportation**

SEKO began as a domestic freight forwarder in the United States in 1976. Since then, we have expanded our service offerings to include Global air and ocean services. While SEKO continues to expand worldwide, we still excel at highly specialized domestic ground transportation services in the United States.

“Thank you guys! You really made us look good on this one. I appreciate everyone’s hard work and dedication on this load as it was not an easy cover. SEKO has been raised up a bar in my list of who to call to get things done. I was very impressed by this team and their abilities, they made last night go from negative to positive and that is why I am congratulating you on providing a wonderful service to me, and a job well done!”

**Dusty Brandon Turnmire – Menlo Electrolux**

## FTL/LTL

SEKO provides full truckload and less-than-truckload services for domestic distribution in the United States, Mexico and Canada. As a non-asset based carrier, we have relationships with hundreds of trucking companies, and can optimize your ground cargo flows based on the best cost and transit time available.

## Expedited Hot Shots

When it absolutely needs to get there same day or next day, SEKO offers expedited and Hot Shot deliveries as a more economical option than domestic air freight.

## Lower Transportation Costs with SEKO TMS

For shippers that currently have their own tariffs with carriers, you can take full advantage of our in-house developed Transport Management System (TMS) to provide your staff with the most economical option for each and every shipment. This reduces total transportation costs and lead times, by taking the carrier selection process to an objective and cost effective program.

## Freight Payment and Auditing

With SEKO TMS, we offer freight payment and auditing of freight bills by carriers on your behalf. Your tariffs are measured up against performance for each and every domestic ground shipment in our system.

## Technical Distribution

For more complex deliveries that require coordination with technicians and installers, we will work with all parties involved to coordinate time-definite deliveries. Our systems are built with features that allow for communication between multiple parties. So whether it's for a POS distribution to retail stores, or the delivery of a medical device to a hospital - SEKO maintains active communication throughout.

## Home Delivery/Final Mile

SEKO Home Delivery is your most reliable, most cost-effective option for final mile delivery of eCommerce, heavyweight, oversized and high value goods. It features time definite appointments, online delivery scheduling and automated service messages, complete with additional services such as set up, trash removal and more.

## We Specialize in Special Handling

We offer all sorts of project cargo services, including flatbeds and oversized, and we deal in all manner of sizes and weights for specialized cargo.

## North American Transborder

Shipping across international borders can be intimidating, but not when you're shipping with SEKO. Whether it's FTL or LTL, to or from Mexico or Canada, we take the worry out of North America delivery.

**"Thanks for handling the first shipment so efficiently. I know when I turn my freight over to you guys, you make it happen and I don't have to worry about it!"**

**Ginny Tracy - Elanders**
