

Intelligence Delivered

Services for Displays and Marketing Projects

We understand that you have a great deal of time, money and expectations invested in your tradeshows, exhibits, special events and retail merchandising display stands. That's why we offer a suite of specialized technology and logistics solutions for your experiential and event marketing programs.

Designed specifically to accommodate rigid deadlines, little or no down time, product launches, store openings and irregular pickup and delivery hours, this is the most dependable way to ensure maximum brand engagement for your promotional events and POS marketing support.

Special Status

With our exhibits and displays solutions, your shipments receive special status throughout the SEKO network. That means all of our Global offices know to move your tradeshow, display and store launch and event materials quickly, safely and immediately.

Retail Merchandising Displays

Whether you have complex installations of in-store displays or need to launch new merchandising to hundreds of stores by a definite date, SEKO is there for you around the globe. We provide final mile delivery and reverse logistics support for all display materials, in addition to local warehousing and replenishment solutions.

Store Fixtures for Grand Openings

If you are expanding your retail operations, or overhauling your marketing displays and products, there is no better partner for your Global supply chain needs. SEKO handles the consolidation at origin, transportation, warehousing and on-site project deliveries and technical installations for all displays and materials in time for your store openings.

Tradeshows and Exhibits

We know the tradeshow business doesn't conform to a 9 to 5 schedule. That's why we offer round-the-clock pickup and delivery – so you can rest assured your shipment will be secure, no matter what time of day. We are experienced with the complexities of deliveries to the major convention centers and hotels around the world, and we're able to accommodate your time definite events wherever they are.

Event Management

The specially customized MySEKO Tradeshow Express Bill of Lading is interactive, and similar to the MySEKO cargo Bill of Lading. Tradeshow Express allows you to free type the shipper and consignee and offers additional fields that allow you to specify rooms, buildings, floors and so on in large tradeshow venues. There are also fields for show start and end times, freight delivery windows and multiple contacts. These added fields ensure accuracy and reduce errors when delivering to large convention centers.

Supply Chain Visibility

You'll know the status of your shipment every step of the way with MySEKO Tradeshow Express. With this new and updated tradeshow-specific online portal, your shipment is tracked 24 hours a day, seven days a week. So if you have a question – any time, day or night – SEKO can answer it and tell you exactly where your shipment stands in transit. You can even communicate via Instant Message directly with our customer service staff.

“Scott and Heather have helped me out tremendously with two shipments that have been a challenge.”

Keith Fugee - Display Vision

About SEKO Logistics

We provide a suite of logistics services which enable you to use your supply chain as a competitive differentiator. As a customer centric organization, we are powered by the expertise of our people and our in-house developed, best in class, customizable technology. It is this combination which gives SEKO its strength.

With over 120 offices in 40 countries worldwide, SEKO's unique shareholder management model enables you to benefit from our specific industry sector expertise, coupled with vital in-country knowledge and unparalleled service at the local level. This unique model provides you with:

- Hands-on service and support
- Personal relationships
- Creative, customized solutions
- Responsiveness and reliability
- Flexibility and consistency

We have a flat management structure, with just three layers between you and the CEO, making us 'fast on our feet' in delivering solutions that can meet your exact requirements. This lean and nimble structure increases our decision-making speed and gives us an ability to implement customized solutions which far exceed those of our competitors.
