

SEKO

Intelligence Delivered

Ocean Logistics

SEKO's Global network encompasses more than 40 countries worldwide, including all of the world's major seaports. Our employees are intimately familiar with all the local customs laws and regulations - saving you time and money, and ensuring your shipments reach their final destination safely.

We manage tens of thousands of Containers, also known as TEUs, every year - to and from Asia, Europe and North America. We have strong working relationships with the largest ocean carriers in the world, which enables us to offer flexible routing and multiple service options for both part container (LCL) and full container (FCL) movements.

“You took the initiative to pre-book for a vessel that works with our schedule and that of the customer without me even having to say anything, and it’s the right call. That’s exactly what I’m talking about when I say superb service, and we get that day in and day out from SEKO!”

Dan Ninerell - Hutchinson Industries Inc.

Supply Chain Visibility

We stand alone in the sophistication and performance of our tracking and tracing capability thanks to MySEKO, our online customer portal. MySEKO lets you track your freight from origin to destination, giving you access to view and upload all necessary documentation, and to receive status updates via email and customized reports. We also provide ocean carrier management for your direct contracts with the steamship lines.

NVOCC Means Freedom and Flexibility

Because SEKO is a non-vessel operating common carrier, we're not locked into strict sailing schedules. That gives us the freedom and flexibility to schedule your cargo on a variety of steamship lines, enabling us to find the vessel and the sailing time that best meets your needs and budget. And because we can pick and choose our carriers, we can access more ports, more cost effectively than vessel operating carriers.

Customs Clearance

Complex paperwork, language difficulties or cultural barriers are all a thing of the past, as SEKO whisks your shipment from the dock, through customs and on to a truck for delivery to its final destination. We handle everything seamlessly.

Dedicated LCL Consolidations

Steamship lines are not interested in handling small shipments. But with our dedicated LCL consolidations from origin, we can consolidate your LCL orders and give you the same advantages that larger companies get. We'll also give you one single point of contact for your cargo right through to destination.

Purchase Order Management

Our in-house developed online PO Management System keeps you informed on where your containers are, where they are going, where they are stored and when they have arrived. From any location, it's easy and effortless.

We Specialize in Special Handling

We offer all sorts of project cargo services, including break bulk and RO/RO, and we deal in all manner of sizes and weights for specialized cargo.

“Great! Thanks again for your help. You guys are awesome!”

Mahoney Rashida - NATO NCSA
Sector Norfolk NCLD
